## Overview

## Description

The CAT5 LCD KVM console integrates multiple-port CAT5 KVM switches in a 1U height console. Multiple computers can be controlled from the single monitor-keyboard-mouse console.

There is no better way to save time and money than with a CAT5 console installation. By using the CAT5 console with its sliding console to manage your installation, you will gain below benefits: (1) eliminate the expense of purchasing separate keyboards, monitors and mice; (2) save all the space those extra components would take up; (3) save space that a keyboard, monitor and mouse would take with a standard KVM switch; (4) save on energy costs; and (5) eliminate the inconvenience and wasted effort involved in constantly having to move from on computer to another.

It is easy and fast to install the CAT5 KVM console; you just need to connect corresponding cables to the right ports of the CAT5 KVM and its module without software configuration.

CAT5 Console can connect multiple computers with RJ-45 connector and CAT5 connecting cables. Transmission distance is up to more than 100M, so it doesn't need a KVM extender.

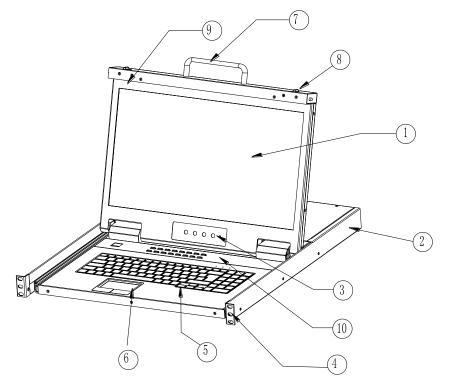

## Features

- 18.5" FHD LCD TFT monitor, high brightness, high resolution
- Metal 19" rack with 1U height
- Ultra slim 99 keys keyboard (PS/2) with small numeric keyboard
- High resolution and high flexibility with touchpad; with two function buttons and scroll wheel, standard PS/2 port
- Resolution: 1920x1080@60Hz

## Switch Functions

- Access and control up to 8 /16/ 32 computes
- Supports Multiple systems: Windows, Linux, Mac and Sun
- Convenient computer switching via front panel pushbuttons, hotkeys, OSD menu or mouse
- Hot pluggable add or remove computers without having to power down the switch
- Auto scan feature for monitoring user-selected computers
- Broadcast mode—operations simultaneously performed on all selected computers
- Keyboard and mouse emulation function.

5	Console

# Hardware Installation

## Rack Mounting

A standard rack mounting kit is provided to mount the switch in a depth of 620-720mm in a standard 19"rack.

For other mounting distance, the rear brackets need to be customized accordingly.

With one person hold the switch in place and the other person slides the L bracket into the switch's side mounting brackets from the front to the back, then screws the brackets to the rack. (See below installation drawing)

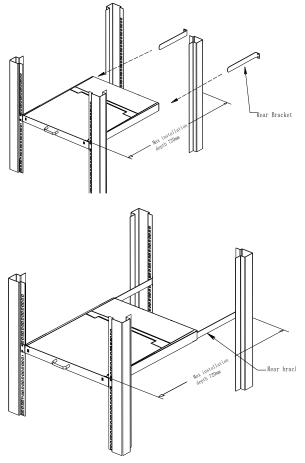

Figure 2.1 Rack Installation Diagram

## **KVM Installation Diagram**

1) Make sure the KVM console has been connected to the ground.( 1)

2) Connect the adapter to the KVM and the PC or server(23)

3) Connect any available KVM port and KVM adapter with CAT5 cables.( 4)

4) Plug the female port of the power cable in the KVM power socket, and plug the male port in the AC power port. (5)

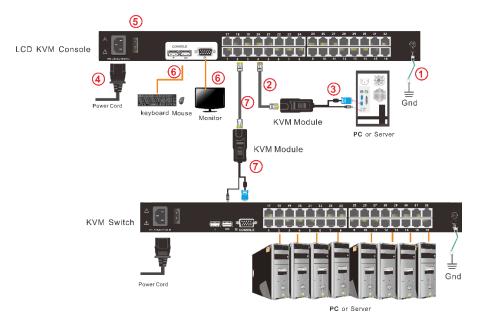

Figure 2.2 Install KVM components

Note:

1. Connect external USB keyboard, mouse and monitor according to the 6 step in

2. If cascading required, please connect KVM console and KVM switch with adapter  $(\bigcirc)$ , and Hotkey need to be different with KVM console and KVM switch. Please check the hotkey setting with OSD below (also page 19):

2.1 Turn off Mouse Hotkey function (F4: Tool ->Mouse Hot 【On】)

2.1 Keyboard hotkey setting (F3: Set -> OSD Hotkey)

```
【Caps Lock】 + 【Caps Lock】
【F12】 + 【F12】
【Ctrl】 + 【Ctrl】 + 【KVM Hotkey】
```

### Operation

Release the release catch;

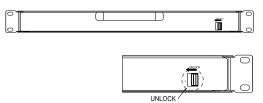

Figure 2.3 unlocking

\*Note: The release lock can only do horizontal locking, it can't bear any load.

- Pull the KVM console all the way out until it clicks into place;
- Rotate the LED module all the way back to expose the LED screen; the LED module can be rotated up to 108°.

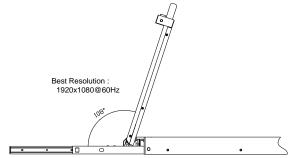

Figure 2.4 open angle of the console

• The KVM makes two "beep" sounds after power on, an OSD window appears for you to input user name and password.

8 Port /16 Port: The orange LED and LED tube are flashing before you enter your password.

Port:

Enter	Name	and	Password	
UserNar	ne :			
Passwor	rd:			

Figure 2.5 password window

- LED panel is powered on when the power LED is green.
- Power on the computer or server after power on the KVM.
  - 8 Port /16 Port: The LED of the connected port is green.
  - 32 Port: There is no port LED.
  - The factory default pass word is blank; double click "Enter "to log in.

## **Closing the console**

- Close the LCD display panel and the power automatically shut down.
- Push the release catch in the direction of the arrow; pull the LED panel all the way in until it automatically locks up.

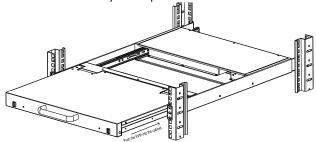

Figure 2.6 unlocking the console

## LED OSD Configuration

The LED OSD allows you to set up and configure the LED display.

Buttons	Functions
MENU SELECT	Press this button invokes the menu function and brings up the main menu.
EXIT/AUTO	Press this button exits the current menu and returns to the previous menu or presses this button exits the LED OSD. Press AUTO for automatic configuration.
SL-/SL+	Press this button moves your menu to make corresponding adjustment.
LED state	Green :running Red: power off or access nonstandard VESA signal Flash green: energy saving mode or no signal

Press AUTO if the screen migrates after power on or under other circumstances, then the screen auto configure to its best display state. (It might can't be adjusted to its best state if part of the display mode is not standard VESA mode, if so return back to OSD menu to RESET, then it will back to normal.

We suggest our customers to set up the display mode at 1920x1080, refresh rate at 60Hz.

## **LED Operating Instructions**

#### Figure 3.1 LED front views

No.	Components	Function		
	1-16	Switching freely from port 1 to port 16		
	Reset	Press [1] and [2] at the same time for three seconds resets the keyboard and mouse		
	Scan	Press [7] and [8] at the same time for three seconds enters the auto scan mode.		
1	Brightness <sup>-</sup> Ö-	Press [3] for three seconds enters brightness adjusting mode. 33 are flashing on the LED tube. Then press [5], [6] to adjust. Press [3] exits or waits for five seconds and it will auto-exit.		
Definition		Press 【 4 】 for three seconds enters definition adjusting mode. 44 are flashing on the LED tube. Then press 【 5 】, 【 6 】 to adjust. Press 【 4 】 exits or waits for five seconds and it will auto-exit		
	Initialize D 🔅	Press 【 6 】 for three seconds will initialize the brightness and definition of each port.		
2	Port Selection Buttons & LEDs	<ul> <li>Indicator LEDs are built into the switches, the online LED light is on the left and the selected LED light is on the right.</li> <li>1. An online LED light (green) indicates that the KVM has connected to its corresponding computer and power on.</li> <li>2. A selected LED light (orange) indicates that the computer attached to its corresponding port is up and running.</li> </ul>		
3	Station ID	Display the current port		

Figure 3.2 32 Port LED front views

No.	Components	Function
1	0~9 +Enter	Switching from port 1 to port 32 Port 8 : If you want to switch to Port 8, press 【8】, and the LED light displays . , then press "Enter", you will come to Port 8. Port 32: If you want to switch to Port 32, press 【3】 and 【2】, the LED light displays . , and then press "Enter", you will come to Port 32.
2	- <b>Ò</b> - (+, -)	Adjust Brightness Press, the LED light blinking with, and then press "+" and "-"to adjust the brightness.
3	• (+, -)	Adjust Definition Press $igodot$ , the LED light blinking with $\Box$ , and then press "+" and "-"to adjust the definition.
4	Station ID	Display the current port

## **OSD Operation**

Double click the right button of the mouse or double click hotkey **[**Scroll Lock **]** to invoke below OSD main menu. You can customize the OSD hotkeys; find more details in OSD function instructions.
